Centre Stage

NOTES:

This schedule of equipment is not exclusive, in that it is understood 9Lies will be bringing with them a minimum amount of items (including guitars and FX) and that the organisers of the event will be supplying the items described in this schedule along with any associated Leads / Mics / stands etc not mentioned but deemed necessary by suitable audio technicians according to the size of the venue/event.

This schedule is for information only to indicate the minimum requirements for 9Lies to perform. 9Lies are flexible with the equipment they can use, however if such suitable equipment is not provided, 9Lies cannot be held responsible and will be unable to perform.

A number of assumptions of the setup have been made when composing this schedule, such that a P.A. system / Sound desk of suitable output and inputs respectively for the venue is used, together with suitable audio technicians to operate such equipment and organise the setting up of the equipment required as described in this schedule.

If any further information is required about this schedule please contact 9Lies as described below.
